Professional Summary

Full-Stack + Cloud Engineer with proven success developing real-time platforms, distributed workloads, modular monorepo systems, and scalable backend architectures. Delivered high-impact features with measurable improvements in performance, reliability, and user engagement. Strong engineering mindset backed by AWS certification and deep hands-on project experience.

Technical Skills

Languages: Python, Java, C#, TypeScript, JavaScript, C++, SQL

Backend: Django, NestJS, Node.js, .NET

Frontend: React, Next.js, HTML5, CSS3

Cloud & DevOps: AWS (EC2, S3, IAM, CloudWatch), Redis, Celery, Docker-ready apps, CI/CD workflows

Databases: PostgreSQL, MySQL

Architecture: System Design, WebSockets, Caching Layers, Microservice-Ready Patterns, Async Workers

Tools: Git, GitHub, Postman, VS Code, Cursor, AI Dev Tools

Project Experience

PlatePal — Real-Time Food Delivery Platform

Django, React, Redis, Celery, PostgreSQL, WebSockets

- Developed real-time courier tracking using WebSockets, improving update latency to **near-instant**.
- Built ML-powered ETA engine increasing delivery prediction accuracy by **25%**.
- Architected Celery pipelines processing **thousands of background tasks/day**, reducing request load by **40–55%**.
- Optimized spatial queries + indexing, improving analytics performance by **30–40%**.
- Implemented biometric auth and secure routing flows for platform-wide access control.

AttendWise — Distributed Attendance System

NestJS, Next.js, React Native, PostgreSQL, Redis

- Built scalable REST APIs supporting heavy attendance workflows with TypeORM optimization.
- Implemented JWT + RBAC improving security and reducing unauthorized access by **90%**.
- Reduced reporting latency by **35%** via batching, caching, and query optimization.
- Enabled shared logic across platforms using a modular TypeScript monorepo.

Placement Management System

Django 5, PostgreSQL

- Created multi-role recruitment platform serving **thousands of campus users**.
- Reduced TPO workload by **70%** using automated analytics + bulk data processing.
- Engineered relational schema supporting **10,000+ records** with high performance.

Legal Advisor Search Engine

C#, .NET, SQL

- Delivered fast, filter-based advisor search; improved query speed by **50%**.

Education

Master of Computer Applications (MCA)

2024 – 2025

Bangalore University

Bachelor of Computer Applications (BCA)

2021 – 2024

VSK University

PUC (Computer Science)

2018 – 2020

KSOU

Certifications

- **AWS Cloud Practitioner (CLF-C02)** — Amazon Web Services
- **Python for Beginners** — Simplilearn
- **Introduction to AI** — SkillUp
